

More possibilities with TRUST

Colour, white ink and varnish in one UV printing platform.

24" × 36"

Maximum print area

Up to 10"

Maximum media thickness

Canadian sales and technical support through IMT.
2-year limited warranty.

Print on products. Add detail and texture.

Signs and display graphics

Braille and embossed effects

Awards and trophies

Cylindrical personalization

Acrylic, wood, glass, metal, selected plastics, leather and more. Material preparation and adhesion testing may be required.

Rotary printing requires the optional attachment. Braille output requires validation against the applicable accessibility standard.

Colour, texture and finish

White ink

Create a white base on dark or transparent materials.

Spot varnish

Add gloss or matte finishes with controlled placement.

Sandwich printing

Print three layers in one go on transparent substrates.

Embossed effects

Produce raised texture and Braille printing effects.

Production controls

Automatic height measurement, white ink circulation and waste ink full-level alerts.

Optional equipment

Rotary attachment, automatic positioning camera and anti-static clean print module. Confirm the supplied configuration in your quotation.
